“Pilotage Units” as used in this subdivision shall be determined by multiplying the overall length of the vessel by the extreme breadth by the depth to the uppermost continuous deck and dividing the total by ten thousand, as expressed by the following:

$$\frac{\text{Overall Length X Extreme Breadth X Depth to the Uppermost Continuous Deck}}{10,000} = \text{Pilotage Units}$$

All measurements shall be in feet and inches (U.S.). The Board of Commissioners shall be the sole arbiter with respect to any questions concerning these definitions. The decision of the Board shall be final.
